dino d-day last stand dlc

Worth it , a lot of new content for the price ,new enemies , new upgrades + i tried the arena and its great! There is also one more new third area west from the new area that needs to get unlocked yet..Still the most annoying thing by far is the wind that moves you lol. got to admit for a small game it is actually good thou some things was lacking like your special weapons cant be upgraded still enjoyable. I backed this game on kickstarted and played the beta. It is much better with a controller than trying to use the keyboard controls. Otherwise, this is a pretty relaxing game that I feel is similar to Stardew Valley.. A thoroughly enjoyable HOG/adventure game hybrid. Playable by newcomers to the genre or veterans, and the story has some great B-movie shenanigans. I really like the HOGs that have more going on than just hidden-object finding, so this is a definite winner for me.. A simple and nice game, i liked.. I don't recomend buying this game. Don't buy it unless it is below \$2.00. It's pretty bad. The gaphics are horrible. The gameplay was evan worse. It wouldn't let me finish my turn every now and then. I had to re-load the game over and over. There ais no way to change the controls or sound level. On the first level it just threw you in the game. It took me 2 hours to complete the first level. The only reason i kept playing was because I was determined to beat the first level. I read the other reviews and ignored them and thought, it's the Civil War it can't be that bad. I love to study the Confedercy and I am a proud Alabama patriot. The game overall was horrible. Just because it was the Civil War I would have to give it a 2/10. The game producers could have made it a really good game. If they had just made the first level on 20 turns at the maximum ,tried to fix the mechanics, and added buildings or forts to the game. I see what they where going for but they failed. (Although I did enjoy watching and moving my little ironclad and gunboats for about 10-15 minutes. Than I realized this game would last for a long, long time.). Oh yeah probably one of the best outfits in the whole game cool yo. Another dime released just 7 months after the Road to Hill 30. Playing as Red was as much as fun as playing Baker. 10/10. I hate to rate things poorly, but this unfortunately is one of the weaker Guilty Gear titles.

The issues with this aren't tied to the game however, it's tied to the weak port.

There is little controller support (I still haven't figured out how to set up a controller to player 1), and more importantly, there was nothing done to add an online component.

That's right, this is local multiplayer only.

If you're in it for the nostalgia, go ahead and grab, just don't expect to be able to do much outside of local on a keyboard.

It was quite boring. The noise to find the balls gave me a crashing headache! I won't even finish this as it is too tedious. 4 out of 10 for me.. "Sorry guys, we had a bad life and made some bad design choices and now we need you to pay for the game again that you've been waiting for all this time."

Uhhh, no?. a e s t h e t i c. A simple, colorful roguelike. Not gory or violent either, it serves as a very good introduction to the genre even if you're 5. Doesn't mean the game is easy though. Its a decent length. 12 hours in and I'm getting around the last bosses.

Stat system is simple with Attack, Dodge, Aim, and Luck, with Luck affecting crit chance, in which crits deal double damage as well as heals you. You get to choose from two stats to gain a point when leveling. Price is great for the content. Highly recommended for anyone who could use a turn-based roguelike, even if for just a bit.

EDIT: a Posthumous statistic:

Took about 22 hours to finally win--This is somewhat lower than other roguelikes, but still fits the game well.

Winning game took just over an hour.

Died just shy of 100 times.

Final verdict: Definitely worth face value.
