Turbo Play is an easy-to-use and feature-rich software audio and video editor, which enables you to create professional-quality animations, videos and presentations. At first, you start a project with the audio or video elements you want to use. You can use the timeline, the 3D button or various content libraries to create your project. Then you can add text, images, particles, effects and transitions to the timeline. You can also assign keyframes to control the visual content. Throughout the timeline, you can move media and images with ease and fine-tune them. You can also use the timeline for audio media, including loops and plugins. This is where the 3D and special effects come into play. You can use interactive panning in the timeline, e.g. you can pan around a 3D scene or simply move your video in the horizontal plane. You can also set the position and scale of the 3D camera, apply camera movement and place the viewport anywhere in 3D space. During the live performance, you can use the timeline to apply a scale and play a clip. You can use special effects such as scale, hue and lighting. You can also add a video thumbnail to the preview window for multimedia presentations and videos. Finally, you can render the presentation, a video or an animation. Additional 3D effects, transitions and a built-in video player help you create stunning animations. Turbo Play integrates well with various multimedia files, such as movies, images and videos, as well as 3D files, such as cube files, 3DS files, OBJ files, BMP and JPG files. Turbo Play's built-in 3D engine supports many formats, including AI, PAK and FBX, DAE, OBJ and 3DS. Audio and video effects include noise reduction, audio filtering, reverb, compressor, equalizer, audio clippers, buses, and many more. Extra features include a multi-channel audio mixer, MIDI support, keyboard mapping and software learning. Application Features: • Find the perfect clip • Multitrack media • Timeline with keyframes • Manipulate audio and video clips • Rendering • Effects and transitions • Transform with various 3D assets • Manage 3D assets easily • Edit audio and video content • Media and multimedia libraries •
